Which floor is best for you?

When it comes to investing in indoor sports facilities or other athletic flooring, it’s important to understand the complexities involved in the floors specialist design. Considerations when specifying a high performance floor include:

- Expected standard of performance
- Required levels of shock absorption and surface firmness
- Quality and frequency of use
- Recommended surface type
- Available budget

Different performance characteristics can be achieved to ensure the right system for specific areas (weights, aerobic activity, sprint lanes etc.) using various levels of shock absorption and surface firmness.

No two projects are the same and, for this reason, TigerTurf works in close partnership with clients throughout the process to ensure our combined vision and passion is reflected in a professional result. TigerTurf’s qualified team will discuss your requirements, recommend the best options and deliver that for you.

Why Infinity Performance and the benefits for you.

The polyurethane surface is highly versatile Sports Surface providing a worry-free, multi-purpose surface ideal for Indoor Rugby, Football, Basketball, Netball, Volleyball, Badminton, Tennis, and many other activities. Benefits of the Infinity Performance floor system are:

- Extremely hard-wearing - last the lifetime of the building
- A more comfortable surface for coaches and teachers
- Different configurations of the PU layer alters performance characteristics to ensure the correct system for specific requirements
- Low noise levels compared to wooden floors
- Low maintenance costs
Infinity Performance is the ultimate sports flooring system for all indoor sports areas and gymnasiums from the elite athlete training centre to community sports and recreation spaces.

The Infinity Performance flooring system comprises a pre-fabricated SBR recycled rubber mat for point elastic performance. This is covered with a multi-layer 2 – 3mm polyurethane Performance Layer Coat and semi-gloss finish polyurethane Sports Coat. The polyurethane surface is perfect to accommodate all sports – Rugby, Futsal, Football, Volleyball, Basketball, Netball, Badminton, Weight Lifting and Tennis. It is also durable enough to handle other non-sport related events such as meetings, dances and community events and many other activities.

Infinity Hybrid is the floor of choice for the recently completed NZ High Performance Sports Centre at Jellie Park in Christchurch. The surface combines TigerTurf’s Infinity Performance multi-purpose polyurethane flooring system with a high performance area-elastic wooden floor creating an exceptional, highly durable multi-purpose floor.

The floor is perfect to accommodate all sports – Rugby, Futsal, Football, Volleyball, Basketball, Netball, Badminton, Weight Lifting and Tennis as well as other community events.

What our customers say
The NZ High Performance Centre required a state-of-the-art high performance area/point elastic systems that would provide the performance needed for a diverse range of athletes. The TigerTurf Infinity Combi Performance floor is perfect for our requirements and we are extremely happy with the final result. Having worked with Stewart on a previous project I was confident we would get the outcome we needed and we did.

Iain Ansell - Director of Sport South Island, NZ High Performance Sports Centre

INFINITY, FOR THE PERFECT LANDING

Serious about environmental responsibility
Creating an environmentally responsible product is taken very seriously by the TigerTurf system designers. Wherever possible, techniques and technologies are employed in the manufacturing and construction processes to deliver an end product of high environmental consciousness.

Renewable Raw Resources
TigerTurf Performance coatings and adhesives are based on renewable resources, not contributing to degradation of precious limited resources.

No Hydrocarbon gases
Polyurethanes used in the Infinity systems are either 100% solids (no solvents) or water based thereby eliminating any potential release of hydrocarbons into the atmosphere.
