TigerTurf Tennis Range

Tennis is played on a variety of natural and artificial surfaces worldwide, depending on factors like climate, location and player preference. Synthetic courts are popular because they offer better playability in both good and bad weather, without sacrificing the consistency, comfort or safety that players need to enjoy the sport.

TigerTurf synthetic courts are designed to meet the highest playing standards dictated by the ITF. Our courts are available in a variety of colours, and offer long term value with lower maintenance requirements than their “natural” alternatives.

Advantages for the Player
• The more you play the better you get! With a TigerTurf all-weather court there’s simply more playing days in the year.
• The combination of superior all-weather traction and a shock-absorbing surface reduces the risk of injury and stress to ankles, knees, hips and the lower back.
• TigerTurf can create a surface to exactly meet your requirements whether you want a court that matches the different bounce, ball speed and performance qualities of grass, clay or hard courts.

Advantages for the Club
• Because TigerTurf courts can be used intensively, all year round, the courts are more consistently playable and your club can generate increased revenue.
• TigerTurf is made from the highest quality synthetic yarns and is tested under rigorous conditions to provide many years of trouble-free playing. It is resistant to staining and UV stabilised.
• Your TigerTurf surface is made to order and is backed by our written product guarantee, subject to the surface being used and installed to TigerTurf’s specifications.

Advantages for the Community
• TigerTurf surfaces are ITF tested to meet critical performance criteria.
• TigerTurf is part of a worldwide group that has been manufacturing and installing tennis courts for over thirty years. Our internationally acclaimed synthetic sports surfaces have been a resounding success in thousands of installations across more than 80 countries.
• TigerTurf conducts on-going research and development to find more efficient manufacturing and installation methods, as well as being involved in research projects looking closely at developing 100% recyclable products for the future.
SPOIL FOR CHOICE

- TigerTurf has surfaces for players of all ages and abilities to enjoy. Our range can match different bounce, ball speed and performance whether you prefer grass, clay or hard courts.
- TigerTurf’s short pile range, including Advantage Pro and Volley Pro, are tested to ITF standards and are classed as medium to fast surfaces, which take spin and offer excellent grip. Moreover, players of all ages and abilities benefit from the added resilience offered by the dense fibre.
- Developed over the past 30 years, the medium pile TigerTurf tennis range offers affordability for both clubs and the private court owner who are looking for the ultimate recreational surface. Our medium pile surfaces, including favourites Tournament and Tournament 1000, are long lasting, low maintenance and fit into any home and landscaped setting.
- TigerTurf’s synthetic Clay Turf surface has similar playing characteristics to natural clay. This surface offers a fantastic option for clubs, particularly for coaching and up and coming promising players who want to hone their skills on a surface usually found only in Europe.
- TigerTurf also supply and install a full range of acrylic surfacing options. From economical acrylic hard court coatings to high performance cushioned acrylic surfaces, TigerTurf can meet your needs.

OUR TOTAL PACKAGE
